## STOCK MARKET

Now that it has been demonstrated that the strike on the local railroad has not embarrassed the Tonopah mining companies to any great extent, confidence in the stocks seems to have returned, and yesterday's closing quotations as received from the San Francisco stock exchange, showed an upward gain. Both Tonopah Mining and Belmont closed with gains of 2 1/2 cents each. MacNamara and West End advanced two points while Midway went up one point. The number of sales are increasing, and many parties who sold short, are being forced to cover.

## Booth Looks Like An Early Shipper

Booth stock took an advance this morning of five cents, going from the close of 11 cents on Saturday to 16 cents on the opening. This is due to the fine showing on the Weber-McLaughlin lease, which on Saturday at noon, was showing two inches of \$60 ore, but has now opened up to twelve inches of shipping ore, with several smaller stringers of good ore coming into the six feet of good milling ore in which the upraise is being made. The upraise is now up about ten feet, and the showing is materially better with every foot of progress. The whole ore shoot in which the upraise is being sent is some 16 feet in thickness, and the upraise is being sent up on the footwall, every pound of rock extracted being good milling ore. It looks as though the Weber-McLaughlin lease is due to be a shipper in the very near future.—Goldfield News.

## NEEDLES SMELTER BIDDING FOR ORE

## Tidewater Railroad Issues New Schedule Which Shows a Reduction of Fifty Per Cent.

The Needles smelter, which has recently passed into the control of the United States Smelting and Refining company, has arranged to enter the Goldfield district in active competition for the purchase of ore, and the Tonopah & Tidewater railway will co-operate with them by making a low freight rate, effective May 20. This schedule, just issued by W. W. Keith, general agent of the road, will be much lower than the rates in force at present, and shows a strong contrast with rates to the Pacific Coast and Utah smelters. The following figures show the present and new rates from Goldfield to Needles, effective May 20th:

Ore value.	New Rate.	Pres. Rate.	Present Rate Coast and Utah Smelters
\$ 15.00	2.54	3.25	5.00
\$ 20.00	2.54	3.50	5.00
\$ 30.00	2.54	3.90	5.00
\$ 40.00	2.90	4.40	5.50
\$ 50.00	3.30	4.80	6.00
\$ 60.00	3.75	5.25	6.50
\$ 70.00	5.25	6.75	7.00
\$ 80.00	5.65	7.50	7.50
\$ 90.00	6.00	8.00	8.00

## OFFICIAL OF BELMONT DENIES RUMORED FIND

SAYS LEDGE SHOWING FREE  
GOLD EXISTS ONLY IN  
IMAGINATION.

The discovery of an ore body with phenomenal values, was rumored to have been made Sunday night in the Belmont mine, the scene of the find being named in the easterly workings of the 1000-foot level. According to the report the ledge was the richest yet discovered in this mine, the rock showing plainly a quantity of free gold on the surface.

When asked about the rumor superintendent Bradshaw announced that it was entirely unfounded and had evidently been started by the encountering of a small ledge several days ago. A portion of the ledge could be termed of a high-grade quality, but it had not been prospected, the work having been stopped. The ledge, or vein, according to Mr. Bradshaw, was the continuation of an ore body known to exist and being worked at no little distance from the place it was encountered.

## Why Send Out of Town for Your Printing

When you can have first-class work done right here, by first-class union printers.

The business man who sends out of town for his printing injures his own business as well as that of others. While on the other hand the man who patronizes home institutions increases the town's pay roll, and thereby builds up his business.

The printers and book binders in the cities of surrounding states do not come here to spend their money.
